

Clutch Disc for Auto Transmission Systems

This clutch disc is designed for optimal power transfer and durability. It incorporates a sprung hub for effective vibration damping and robust friction material for enhanced grip.

Product Overview

High-Performance Clutch Disc

This clutch disc is engineered for optimal power transfer and long-term durability in automotive transmission systems. It features robust friction material designed for enhanced grip and a precision-engineered sprung hub that effectively damps vibrations. The design ensures smooth engagement and an extended operational lifespan, making it a reliable choice for various vehicle applications.
