

Clutch Pressure Plate for Auto Transmission

This clutch pressure plate is designed for optimal clamping force and durability. It ensures efficient power transfer and reduced slippage.

Overview

High-Performance Clutch Pressure Plate

This clutch pressure plate is engineered for heavy-duty automotive transmission systems, specifically designed for Scania truck applications. Built to deliver reliable performance, it ensures efficient power transfer and smooth engagement under demanding driving conditions. Its robust construction and precise dimensions provide optimal clamping force for long-term durability.

Technical Specifications

Dimensions

430 mm
Diameter

Part Reference	RCP9162
Internal ID	SCPV02

Compatibility & Origin

Country of Origin
China

Vehicle Application	Scania Trucks
