

CNC Aluminum Motorcycle Brake Lever Pedal

This CNC aluminum motorcycle brake lever pedal is designed for enhanced performance and durability. It features a lightweight construction with a precision fit, providing improved braking response and control.

Overview

High-Performance CNC Brake Lever

This CNC machined aluminum brake lever pedal is engineered for enhanced performance and durability across various motorcycle models. Its lightweight construction ensures a precision fit while providing improved braking response and tactile control for the rider. Built with a robust pivot mechanism, it offers smooth operation and long-lasting reliability in demanding environments.

Technical Specifications

Manufacturing Process

CNC Machined

Key Features

- Lightweight construction
- Precision fit design
- Improved braking response
- Robust pivot mechanism
- Smooth operation

Material

Aluminum

Application & Compatibility

Compatible Vehicle Types

Motorcycle, Dirt Bike, Street Bike, ATV, Scooter

Service & Customization

OEM Service

Yes

Custom Requirements

Parts can be supplied based on specific client requirements.
