

CNC Corner Cleaning Machine for PVC Profiles

This CNC machine is designed for cleaning welding seams on PVC profiles. It cleans multi-shaped welding seams on the top, bottom, and outside vertical surfaces simultaneously.

Product Overview

Professional CNC Corner Cleaning

The SQJ-CNC-120B-3 is a high-precision CNC corner cleaning machine engineered specifically for PVC window and door profile processing. This unit automates the finishing process, ensuring perfectly clean corners with consistent results every cycle. Designed to enhance production efficiency, it combines advanced numerical controls with a user-friendly interface to streamline your manufacturing workflow.

Technical Performance

Performance Metrics

2 kW

Input Power

2800 r/min

Motor Speed

100 L/min

Air Consumption

Operating Air Pressure

0.5 MPa

Profile Specifications

Compatible Profile Range

Parameter	Range
Profile Width	20-120 mm
Profile Height	20-120 mm

Cleaning Precision

- Groove width: 3 mm
- Groove depth: 0.3 mm

Dimensions and Requirements

Power Supply

220V/50Hz

Machine Footprint

1700 x 900 x 1600 mm
