Overview

Precision Woodworking Solution

This CNC double-sided copy shaper is engineered for high-efficiency woodworking, combining shaping and sanding capabilities in a single automated unit. Designed for mass production, it excels at processing furniture components, doors, and windows with exceptional accuracy and repeatability. The system features an intuitive user interface and integrated safety protocols to ensure both operational ease and worker protection.

Technical Capabilities

Processing Units

- Dual shaping units
- Integrated sanding units
- Simultaneous double-sided processing

Control System

CNC Automated Control

Safety & Operation

Safety Features

Safety Guards, Emergency Stop

User Interface

User-friendly digital programming interface

Applications

Suitable Applications

Furniture Components • Door Manufacturing • Window Frames • Intricate Wood Moulding
