

CNC Drilling and Milling Machine

This high-precision CNC drilling and milling machine is designed for versatile metalworking. It features a rigid frame, advanced control system, and high-speed spindle for efficient and accurate machining.

Overview

High-Precision Machining Solution

This CNC Drilling and Milling Machine is engineered for versatile metalworking applications, offering a rigid frame construction for enhanced stability. It features an advanced control system and high-speed spindle capabilities to ensure efficient and accurate machining across various materials. Designed for productivity, the machine supports multi-axis configurations for complex part geometries and includes automated features to streamline precision drilling, milling, and tapping operations.

Technical Features

Control System	Advanced CNC Control System
Lubrication	Auto timing lubrication system
Cooling	Yes

Equipment & Accessories

Standard Equipment	Half machine enclosure, Coolant system, Work lamp
Model Identifier	ZXK-32
