

CNC Lathe

This CNC lathe is used for metalworking and machining, featuring a fully enclosed work area for safety. It is equipped with a multi-axis control system for machining complex parts with high precision.

Overview

Precision CNC Lathe

This high-performance CNC lathe is engineered for precision metalworking and complex machining tasks. Featuring a robust, fully enclosed design, it ensures operator safety while effectively containing chips and coolant during high-volume production. Equipped with an advanced multi-axis control system and intuitive interface, this machine streamlines programming and monitoring for consistent, high-quality output.

Technical Specifications

Model Number	CKE6136S
Machine Type	CNC Lathe

Features

Productivity Enhancements

- Automatic tool changer
- Integrated bar feeder
- Multi-axis control system
- Fully enclosed work area

Safety Compliance	Fully Enclosed, Chip Containment
