

CNC Lathe

This CNC lathe is designed for machining various materials with accuracy and efficiency. It features a programmable control system and rigid structure, making it suitable for small to medium-sized production runs.

Product Overview

High-Precision CNC Lathe

This high-precision CNC lathe is engineered for machining a wide variety of materials with exceptional accuracy and efficiency. Featuring a robust, rigid structure to ensure stability during operation, it supports versatile manufacturing tasks including turning, threading, and drilling. Designed for small to medium-sized production runs, this machine is a reliable solution for diverse industrial applications.

Technical Specifications

Key Features

- Programmable control system
- High-precision machining
- Rigid structural design
- Suitable for small to medium production runs

Model Number	CK6130
Machining Capabilities	Turning, Threading, Drilling
