

CNC Lathe

High-precision CNC lathe designed for various machining operations. It is suitable for producing complex parts with tight tolerances in materials such as metal and plastic.

Overview

High-Precision CNC Lathe

This high-precision CNC lathe is engineered for versatile machining operations, providing robust construction and reliable performance. It features a user-friendly interface combined with automated tool changing capabilities to enhance productivity. The system is designed for manufacturing complex parts with tight tolerances in both metal and plastic materials, utilizing a programmable control system for consistent, repeatable results.

Technical Specifications

Model	CK6130
Compatible Materials	Metal, Plastic

Key Features

Capabilities

- Automated tool changing
- High-precision machining
- Programmable control system
- Tight tolerance production
