

# CNC Lathe for Cylindrical Workpieces

This CNC lathe is designed for machining cylindrical workpieces with high precision. It features a rigid machine bed, precision spindle, and programmable control system.

## Overview

### High-Precision CNC Lathe

This CNC lathe is engineered specifically for the machining of cylindrical workpieces. It features a rigid machine bed, a precision spindle, and a programmable control system, ensuring tight tolerances and repeatable accuracy. Designed with a user-friendly interface, it offers efficient programming and operation for a variety of industrial applications.

## Technical Specifications

Model Number	CK6130
Key Features	Rigid machine bed, Precision spindle, Programmable control system, User-friendly interface

## Applications

### Primary Applications

- Machining cylindrical workpieces
- Applications requiring tight tolerances
- High-repeatability manufacturing
