

CNC Lathe for Metal Machining

This CNC lathe is designed for machining metal and other materials. It features a programmable control system, a sturdy frame, and a variety of cutting tools.

Product Overview

Professional CNC Metal Machining

The CK6136 is a precision CNC lathe engineered for efficient metal machining and fabrication. Featuring a sturdy, vibration-resistant frame and a sophisticated programmable control system, this machine ensures consistent accuracy for small to medium-sized production runs. It is designed to accommodate a variety of cutting tools, making it a versatile asset for modern workshops and industrial manufacturing environments.

Technical Specifications

Production Scale

Small Production Runs • Medium Production Runs

Model Number	CK6136
Category	CNC Lathe, Metal Machining, Industrial
