

# CNC Lathe for Metal Machining

This high-precision CNC lathe is designed for machining metal and other materials with exceptional accuracy and efficiency. It features a rigid machine bed, a powerful spindle motor, and a user-friendly CNC control system.

## Overview

### High-Precision CNC Lathe

This CNC lathe is engineered for high-precision metal machining, offering exceptional accuracy and efficiency for professional manufacturing environments. It features a rigid machine bed and a powerful spindle motor, ensuring stability during demanding operations. With an integrated multi-tool turret for automated changes and a built-in coolant system, it is an ideal solution for prototyping, small-batch production, and complex precision manufacturing.

## Technical Specifications

### Primary Applications

- Metal Machining
- Prototyping
- Small-batch Production
- Precision Manufacturing

<b>Model Identifier</b>	CK6 300
<b>Key Features</b>	High Precision, Multi-tool Turret, Automated Tool Change, Integrated Coolant System, Rigid Machine Bed
