

CNC Lathe Machine

This CNC lathe machine is designed for precision machining operations. It features a digital control panel and a sturdy base, ensuring robustness and durability for industrial applications.

Overview

Precision CNC Lathe Machine

The CQK9332B CNC lathe is a robust and durable machining solution engineered for high-precision industrial operations. Featuring a protective enclosure and an intuitive digital control panel, it offers reliable performance for complex turning tasks. This machine is built with a sturdy base to ensure stability and accuracy throughout demanding production cycles.

Technical Specifications

Model Number	CQK9332B
