

CNC Lathe Machine for Precision Machining

This CNC lathe machine is designed for precision machining of various materials. It features a rigid structure, high-speed spindle, and advanced control system for efficient and accurate turning operations.

Overview

Precision CNC Turning Solution

This CNC lathe machine is engineered for high-precision machining across a variety of materials. Featuring a rigid structure and a high-speed spindle, it ensures stability and efficiency during complex turning operations. The advanced control system and user-friendly interface allow for versatile programming, making it an ideal choice for demanding applications in the automotive, aerospace, and general manufacturing sectors.

Technical Specifications

Suitable Industries

- Automotive
- Aerospace
- General Manufacturing

Model Number

CK6130

Key Capabilities

Precision Machining, High-Speed Spindle, Complex Geometry Programming
