

CNC Machine Tool Control Panel

This is a digital control system for CNC machine tools. It features a monochrome display, alphanumeric keypad, and function buttons for programming and controlling machine movements.

Product Overview

Professional CNC Control Interface

This digital control system apparatus is engineered for precise machine tool management, offering robust control for CNC applications. It features a comprehensive alphanumeric keypad and dedicated directional controls, allowing operators to program and manipulate machine movements with high accuracy. Designed with safety in mind, the unit includes a prominent emergency stop button and intuitive function keys for streamlined operation.

Technical Specifications

Model Identifier	TC212
Supported Axes	X, Y, Z, B, C
Display Type	Green Monochrome

Operational Features

Available Control Functions

- Jog Mode
- Step Operation
- Single Block (Sngl)
- Rapid Traverse
- Incremental Movement (Inc)
- Zero Position

Safety Features

Emergency Stop • Alarm Indicator

Input Interface	Full Alphanumeric Keypad
