

CNC Machine Tool Control Panel

This CNC control panel is designed for machine tools. It features a display screen showing X and Z coordinates, a full alphanumeric keypad, directional controls, and function keys for comprehensive control.

Product Overview

Precision CNC Control Interface

This CNC machine tool control panel is engineered to provide comprehensive command over machining operations. Featuring a high-visibility display for real-time X and Z coordinate monitoring, it ensures operators maintain precise control during complex tasks. The robust interface includes a full alphanumeric keypad and dedicated function keys, streamlining workflows for editing, jogging, automatic operation, and diagnostic processes.

Technical Interface

Interface Features

- Full alphanumeric keypad
- Dedicated directional controls
- Function keys for parameter adjustment
- Tool offset management
- Diagnostic mode access

Display Capabilities

2 Axes

Axis Monitoring

Operational Modes

Supported Operational Modes

Manual, Automatic, Editing, Jogging, Parameter Adjustment, Tool Offset, Diagnostics
