

CNC Machine Tool Controller

This digital control system is designed for machine tools. It features a display screen, alphanumeric keypad, and function buttons for precise control and operation.

Product Overview

Industrial CNC Controller

This industrial-grade CNC machine tool controller is designed for high-precision automated machining processes. It features an integrated display screen, a comprehensive alphanumeric keypad, and dedicated function buttons to ensure efficient operation and control. Built for demanding industrial environments, it provides the necessary interface for complex manufacturing tasks.

Technical Specifications

Interface Capabilities

- Alphanumeric keypad
- Dedicated function buttons
- Digital display screen
- Manual axis control

Control Axes

X, Y, Z, A, B, C

Performance Metrics

Operating Parameters

10.08

System Version

150 mm/min

Max Feed Rate

Compatibility

Application Suitability

Automated Machining • Industrial Control • Precision Manufacturing
