

# CNC Machined Aluminum Metal Block

These aluminum metal blocks are manufactured using CNC milling services for high precision. They are suitable for various industrial applications requiring custom dimensions and tight tolerances.

## ADDITIONAL IMAGES

## Product Overview

### Precision CNC Machined Aluminum

This high-precision aluminum metal block is engineered for demanding industrial applications requiring tight tolerances and structural integrity. Utilizing advanced CNC milling, bending, and welding capabilities, it offers versatile customization options including various surface treatments. Designed to meet international quality standards, it is an ideal solution for building machinery and custom component needs.

## Technical Specifications

Material Grade	6000 Series (6063-T5/T6)
Shape / Type	T-profile / Heatsink
Thickness	0.2-20mm (Customizable)
Precision Tolerance	±0.15mm
Quality Standard	GB5237-2008

## Manufacturing & Services

Processing Services	Bending, Decoiling, Welding, Punching, Cutting
Surface Treatments	Polishing, Electrophoresis, PVDF, Sandblasting

## Logistics & Supply

### Production Capacity

**2500 Ton**

Monthly Supply

Minimum Order Quantity

300 kg

Standard Delivery Time

15-21 days

## Certifications

### Certifications

TUV • ISO 9001 • ISO 14001 • ISO 18001
