

CNC Machined Plastic Prototype

This CNC machined plastic prototype is ideal for functional testing and design validation. Its intricate details and robust design demonstrate precision manufacturing capabilities.

Overview

Professional Rapid Prototyping Solutions

We provide expert manufacturing services for high-quality metal and plastic prototypes, backed by over 10 years of industry experience. Our advanced capabilities include precision CNC machining, vacuum casting, and comprehensive post-processing techniques to ensure your designs are realized with tight tolerances and complex geometries. Perfect for functional testing, design validation, and low-volume production needs.

Manufacturing Capabilities

Core Technologies

- CNC Machining
- Vacuum Casting
- Precision Sheet Metal Processing

Supported Materials

ABS, POM, PP, PU, PC, PA, PVC, Metal

Finishing Services

Available Finishes

Polishing • Painting • Sandblasting • Screen Printing • UV Oil Coating • Metal Oxide • Wiredrawing • Plating • Sheet Metal Welding

Experience

Years of Experience
