

CNC Metal Cutting Machine

This CNC metal cutting machine is designed for high-precision metal fabrication. It features a robust frame, advanced control system, and automated cutting head for handling various metal types and thicknesses with precision and efficiency.

Product Overview

Industrial CNC Cutting Solutions

This CNC Metal Cutting Machine is engineered for high-precision metal fabrication across diverse industrial applications. It features a robust frame construction, an advanced control system, and an automated cutting head designed for repeatable accuracy. The system supports a wide range of cutting technologies, ensuring versatility for different metal types and thicknesses.

Technical Specifications

Available Configurations

- CNC Flame/Plasma Cutting Machines
- CNC Under Water Plasma Cutting Machines
- CNC Precision Plasma Cutting Machines
- Slat Cutting Machines
- CNC Mini-Cutting Machines

Key Performance Indicators

15000 mm

Max Cutting Capacity/Speed

Supported Cutting Methods

Flame Cutting, Plasma Cutting, Under Water Plasma, Precision Plasma, Slat Cutting

Operational Features

Control System	Advanced CNC Control System with user-friendly interface
Automation	Yes
