

CNC Metal Lathe

This precision CNC lathe is designed for machining metal and other materials. It features a robust construction with a fully enclosed work area for safety and chip containment.

Overview

Precision CNC Metal Lathe

This high-precision CNC lathe is engineered for professional metal machining and complex turning operations. Featuring a robust, fully enclosed design, it ensures optimal safety and efficient chip containment during high-speed production. With an integrated programmable control system and digital monitoring, this machine delivers consistent, repeatable results for facing, threading, and general turning tasks.

Key Features

Operational Capabilities

- Turning
- Facing
- Threading

Maintenance & Performance

Coolant System, Automatic Lubrication

Technical Details

Safety Compliance

Fully Enclosed Work Area

Model Number

CK6130

Control System

Programmable CNC with Digital Display
