

CNC Metalworking Lathe

This CNC lathe is designed for precision machining of metal and other materials. It features a programmable control system for automated operation, a rigid frame for stability, and a high-speed spindle for efficient material removal.

Overview

Precision CNC Machining

This CNC lathe is engineered for the precision machining of metal and various industrial materials. It features a programmable control system for automated operations, supported by a rigid frame that ensures stability during high-speed material removal. Designed for efficiency, the multi-tool turret reduces setup times, making it an ideal solution for small to medium-sized production runs across automotive, aerospace, and general manufacturing sectors.

Technical Specifications

Model Number	CK6132-460
Key Features	Programmable Control, Rigid Frame, High-Speed Spindle, Multi-Tool Turret

Safety and Maintenance

Safety Features

- Fully enclosed work area
- Emergency stop mechanisms

Cooling System	Yes
----------------	-----
