

CNC Milling and Lathe Machining Services

CNC machining services provide milling, turning, EDM, and wire EDM, as well as surface grinding. Skilled machinists use 3, 4, and 5-axis CNC machining centers to create turned and milled parts from various plastics and metals.

Overview

Custom CNC Machining & Lathe Services

Our professional machining services offer high-precision milling, turning, EDM, and surface grinding. Using advanced 3, 4, and 5-axis CNC centers, we manufacture custom parts from a wide range of metal and plastic materials. We prioritize quality with 100% QC inspection and offer flexible support for custom designs based on your specific drawings or samples.

Technical Capabilities

A variety of high-precision components manufactured via CNC milling and lathe services.

Materials

- Stainless Steel
- Carbon Steel
- Brass
- Aluminum
- Alloy Steel

Processes

Milling, Turning, EDM, Wire EDM, Surface Grinding, Polishing, Nickel Plating, Chrome Plating

Precision Tolerance

±0.005mm

Compliance & Quality

Certifications

ISO 9001 • CE • SGS

Trade Information

Order Details

1000 pcs

Minimum Order Quantity

12 days

Max Processing Time

Accepted Payment Methods

- T/T
- West Union
- PayPal
