

CNC Multi-Torch Cutting Machine

This CNC cutting machine is designed for industrial cutting applications. It features a multi-torch cutting system and a user-friendly CNC control panel.

Overview

Industrial CNC Cutting Solution

This high-precision CNC cutting machine is engineered specifically for demanding industrial applications. It features a versatile multi-torch cutting system designed to significantly increase productivity and throughput. Built with robust construction, it ensures long-term reliability and accurate performance when processing steel, aluminum, and various other metals with minimal material waste.

Technical Capabilities

Cutting System	Multi-torch
Compatible Materials	Steel, Aluminum, Various Metals

Control & Operation

Operational Features

- Easy programming
- Simplified operation
- High-precision cutting

Control Panel	User-friendly CNC control panel
