

CNC Plasma Cutting Machine

This CNC plasma cutting machine is designed for a wide range of metal cutting applications. It offers a high cutting capacity and a user-friendly interface.

Product Overview

Versatile CNC Plasma Cutting Solution

This cantilever-type CNC cutting machine is designed for precision and versatility in metal fabrication environments. Engineered to handle a wide range of cutting applications, it supports both manual and automated processes. Its compact and portable construction ensures ease of transport and reliable performance across various work sites.

Technical Capabilities

Max Cutting Thickness	0.5 inch
Compatible Materials	Steel, Stainless Steel, Aluminum

Performance Metrics

Key Performance Indicators

0.5 inch

Steel Cutting Capacity

Safety & Design

Safety Features

- Automatic shut-off
- Thermal overload protection

Design Type	Cantilever
-------------	------------

Operation

Operation Modes

Manual • Automated
