

CNC Precision Lathe

This CNC precision lathe is designed for machining metal and other materials with high precision. It is equipped with a control panel for programming and monitoring the machining process, enabling precision turning, facing, threading, and other operations.

Overview

High-Precision CNC Turning Solution

This precision CNC lathe is engineered for demanding metalworking applications, offering robust performance for turning, facing, and threading operations. Featuring a sturdy frame construction and integrated coolant systems, it is designed to maintain high accuracy during continuous operation. The intuitive control panel allows for efficient programming and real-time monitoring of complex machining tasks.

Technical Specifications

Model Identifier	CNC-200
Machining Capabilities	Turning, Facing, Threading
Cooling System	Yes

Key Metrics

Machine Type
CNC Lathe • Precision Tool
