

CNC Precision Lathe for Metal Machining

This CNC precision lathe is designed for machining metal and other materials with high precision. It is suitable for prototyping and small to medium production runs, featuring automated operation and a coolant system.

Product Overview

High-Precision CNC Lathe

This precision CNC lathe is engineered for efficient metal machining and prototyping. It features a fully enclosed workspace to ensure operator safety and an integrated coolant system for optimal performance during production runs. Designed for small to medium-sized manufacturing, this machine delivers high precision and reliable automated operation.

Technical Specifications

Model Number	CK6130A
Machine Type	CNC Lathe

Key Features

Safety & Maintenance

- Enclosed workspace for operator safety
- Integrated coolant system

Core Capabilities	Programmable Control, Automated Operation, High Precision, Enclosed Workspace
-------------------	---

Applications

Best For

Metal Machining • Prototyping • Small Production Runs • Medium Production Runs
