

CNC Vertical Machining Center

This CNC vertical machining center is designed for milling, drilling, tapping, and boring. Its rigid structure ensures stability and accuracy, while the enclosed work area enhances safety.

Overview

High-Precision Vertical Machining Center

This CNC vertical machining center is engineered for versatility and precision in milling, drilling, tapping, and boring operations. Built with a rigid structure for superior stability, it ensures consistent accuracy across various material types. The design includes a fully enclosed work area for enhanced safety and effective chip containment, making it an ideal solution for mold making, aerospace, automotive, and general manufacturing applications.

Technical Capabilities

Suitable Industries

Mold Making • Aerospace • Automotive • General Manufacturing

Supported Operations

Milling, Drilling, Tapping, Boring

Design Features

Structural Design

Yes

Safety & Containment

Fully enclosed work area for operator safety and chip containment
