

CNC Vertical Machining Center

This CNC vertical machining center excels in precision milling, drilling, and tapping tasks. Its rigid frame ensures stability and accuracy during high-speed machining.

Overview

Precision Vertical Machining Center

The KX-L1060 is a high-performance CNC vertical machining center engineered for precision milling, drilling, and tapping operations. Built with a rigid frame construction, it ensures superior stability and accuracy even during high-speed production cycles. The system features an enclosed work area for operator safety and efficient coolant management, making it a versatile solution for aerospace, automotive, and mold-making applications.

Technical Specifications

Compatible Materials

- Metals
- Plastics
- Composites

Key Features

Rigid Frame Construction • Automatic Tool Changer • Enclosed Work Area • High-Speed Machining

Capabilities

Milling, Drilling, Tapping

Performance Metrics

Efficiency Highlights

1 Included

Automatic Tool Changer
