

CNC Vertical Machining Center

This CNC vertical machining center is designed for versatile machining operations. It features a rigid frame for enhanced stability and accuracy during high-speed cutting.

Overview

High-Precision CNC Vertical Machining Center

This CNC vertical machining center is engineered for versatile and demanding machining operations. Built with a rigid frame construction, it ensures superior stability and high-precision accuracy during high-speed cutting processes. Its user-friendly CNC control system simplifies programming, making it an ideal choice for complex manufacturing tasks in industries ranging from aerospace and automotive to mold making.

Performance Metrics

Machining Capabilities

1060 mm

X-Axis Travel

850 KX-L

Model Series

Technical Specifications

Key Features

- Rigid frame construction for stability
- High-speed cutting capability
- User-friendly CNC control interface
- High-precision machining accuracy

Suitable Industries

Aerospace, Automotive, Mold Making
