

CNC Vertical Machining Center

This CNC vertical machining center is designed for milling, drilling, tapping, and boring operations on various materials. It features a rigid frame, high-speed spindle, automatic tool changer, and advanced CNC control.

Overview

High-Precision Vertical Machining Center

This CNC vertical machining center is engineered for versatility and precision in demanding industrial environments. It is capable of performing a wide range of operations including milling, drilling, tapping, and boring across various material types. Built with a rigid frame construction and equipped with an advanced CNC control system, it ensures consistent accuracy and efficient throughput for high-volume production.

Technical Specifications

| | |
|------------------------|------------------------------------|
| Model Number | XK7135 |
| Machining Capabilities | Milling, Drilling, Tapping, Boring |

Key Features

Core Features

- Rigid frame construction for stability
- High-speed spindle for efficient processing
- Automatic tool changer for reduced downtime
- Advanced CNC control system
