

CNC Vertical Machining Center

This CNC vertical machining center is designed for complex milling, drilling, and tapping operations. It features a fully enclosed workspace with an integrated coolant system and a user-friendly CNC control panel.

Overview

High-Precision Vertical Machining Center

The ZMKG95100 is a robust CNC vertical machining center engineered for high-precision milling, drilling, and tapping operations. Designed for stability and rigidity, this machine is ideal for demanding industrial applications requiring consistent accuracy. It features a fully enclosed workspace with an integrated coolant system and chip conveyor to ensure a clean and efficient operational environment.

Technical Specifications

Model Number	ZMKG95100
Machine Type	CNC Vertical Machining Center

Key Features

Operational Capabilities

- Complex Milling
- Precision Drilling
- Tapping Operations

Design Highlights	Fully Enclosed Workspace, Integrated Coolant System, Chip Conveyor, High Rigidity, High Stability
-------------------	---

Control System

Control Interface	User-friendly CNC control panel
-------------------	---------------------------------
