## Product Overview

### Professional CNC Bead Lathe

This high-precision CNC wood lathe is engineered specifically for the efficient production of wooden beads and intricate wood turnings. Featuring a robust metal frame and advanced automated control systems, it provides the stability and repeatability required for both professional woodworking shops and precision hobbyist applications. The machine includes a secure chuck and tailstock assembly to ensure high-quality, consistent results for complex geometric shapes.

## Technical Specifications

Model Identifier	KC120
Build Quality	Robust Metal Frame, Linear Rails, Protective Bellows, Precision Lead Screws

## Key Capabilities

### Core Applications

- Wooden bead manufacturing
- Intricate wood turning
- Complex shape carving
- Automated production

## System Components

### Hardware

Chuck • Tailstock • Tool Rest • CNC Control Box • Motor
