

# CO2 Laser Cutting Machine for Non-Metals

This CO2 laser cutting machine engraves and cuts non-metals including acrylic, wood, and textiles. It is widely used for advertising, gifts, and furniture.

## ADDITIONAL IMAGES

## Overview

### High-Precision CO2 Laser Solution

This versatile CO2 laser cutting and engraving machine is engineered for high-precision processing of diverse non-metal materials including acrylic, wood, leather, and glass. Designed for industrial efficiency, it offers rapid cutting speeds and consistent accuracy, making it an ideal choice for sectors ranging from advertising and furniture to crafts and garment production. The system supports flexible configuration options to match specific operational requirements.

## Capabilities

### Primary Applications

- Craft gifts and souvenirs
- Chinese paper cuttings
- Advertising signs
- Clothing and textiles
- Furniture manufacturing

### Supported Materials

Acrylic, Double-color plate, Marble, Wood, MDF, Plywood, Textile, Leather, Glass, Paper

## Technical Specifications

### Available Working Sizes

#### Dimensions (mm)

600 x 400

900 x 600

1200 x 900

1300 x 900

1400 x 900

1600 x 1000

1300 x 2500

### Optional Configurations

Up-down lifting table • Honeycomb table • Rotary attachment
