Project Overview

International Energy & Mining Contracting

This service provides comprehensive engineering, procurement, and construction (EPC) solutions for large-scale energy and mining infrastructure. With a proven track record in high-capacity coal extraction and power generation, the service model emphasizes turnkey project management from initial development to operational handover. It is designed for governments and large-scale industrial entities seeking to establish or upgrade critical energy infrastructure.

Project Highlights

Key Performance Metrics

1 million tons

Annual Coal Output Capacity

250 MW

Power Plant Capacity

500 million USD

Total Contract Value

Notable Project Scope

Project Type	Location
Coalmine Extraction	Barapukuria, Bangladesh
Coal-fired Power Plant	Barapukuria, Bangladesh
Integrated Coalmine & Power Plant	Sonda-Jherruk

Service Capabilities

Contracting Model

EPC (Engineering, Procurement, Construction) • BOT (Build-Operate-Transfer)

Core Competencies

Energy Investment, Mining Engineering, Power Generation, BOT Contracting, Infrastructure Development
