

Coastal Transport Vessel

This medium-sized ship is designed for coastal transport and Ro-Ro ferry services. It features a multi-deck superstructure with a vehicle deck, along with essential safety and navigation equipment.

Vessel Overview

Coastal Transport Capabilities

This medium-sized coastal transport vessel is engineered for reliable maritime logistics, featuring a versatile multi-deck superstructure. Equipped with a prominent vehicle deck accessible from both bow and stern, it is optimized for efficient loading and unloading operations. The design includes comprehensive safety systems and integrated navigation equipment, making it a robust solution for coastal transit requirements.

Vessel Type

Coastal Transport • Ro-Ro Vessel
