

Coastal Urban Development Design & Planning

Design and planning services for coastal urban development projects. These services integrate residential, commercial, and infrastructure elements to create sustainable waterfront communities.

Project Overview

Coastal Urban Development Design

This coastal urban development project integrates high-rise residential and commercial infrastructure with maritime accessibility. The master plan features a strategic layout including a marina with yacht docking, protective breakwater systems, and a comprehensive network of roads and bridges. Designed to balance modern architectural aesthetics with coastal environmental integration, the plan prioritizes waterfront access and efficient urban connectivity.

Infrastructure Features

Key Infrastructure

- High-rise residential buildings
- Commercial development zones
- Marina and yacht docking facilities
- Protective breakwater system
- Integrated road and bridge network
- Roundabout traffic management

Illumination

Street Lighting

Design Characteristics

Design Focus

Waterfront Access, Coastal Integration, Mixed-Use Development, Modern Architecture
