Product Overview

Coaster Brake Hub Assembly

The DM-CT01 coaster brake hub assembly provides a reliable and efficient braking solution for rear wheels on single-speed bicycles. Constructed from durable steel with a polished chrome-plated finish, this system is activated by pedaling backward, offering intuitive and consistent stopping power. It is an ideal component for urban cycling and recreational riding, ensuring a complete and secure setup for bicycle maintenance or assembly.

Technical Specifications

Primary Application

Single-speed bicycles • Urban cycling • Recreational riding

Model Number

DM-CT01

Material & Finish

Steel, Chrome Plated

Components

Included Components

- Hub
- Sprocket
- Brake arm
- Nuts
- Washers
