Product Overview

Professional Grade Abrasive Solutions

These coated abrasive rolls are designed for versatile sanding and grinding applications across multiple industries. Featuring durable backing materials and high-quality abrasive grains, they ensure consistent performance for efficient material removal and surface finishing. They are suitable for use on a wide variety of surfaces, including wood, metal, and plastic, making them an essential tool for professional workshops.

Technical Specifications

Primary Applications

- Sanding
- Grinding
- Polishing
- Surface Finishing

Key Features

Durable Backing • High-Quality Grain • Consistent Performance

Compatible Surfaces

Wood, Metal, Plastic
