

Coaxial Audio Video Cable

Coaxial cable designed for audio and video signal transmission. It has a central conductor, insulation, braided shield, and protective outer jacket. It is commonly used for connecting antennas, cable boxes, and other audio-visual equipment.

Product Overview

Professional Coaxial Connectivity

This high-quality coaxial cable is engineered for robust audio and video signal transmission. Featuring a precision-designed central conductor, comprehensive insulation, and a braided shield, it effectively minimizes signal interference and loss. It is an ideal solution for connecting antennas, cable boxes, and various professional audio-visual equipment.

Technical Specifications

Construction Details

- Central Conductor
- Insulation Layer
- Braided Shielding
- Protective Outer Jacket

Primary Applications

Antenna Connection • Cable Box • AV Equipment

Signal Type

Audio, Video
