

Coaxial Audio Video Cable

Coaxial cable designed for audio and video signal transmission. It features a central copper conductor, dielectric insulation, braided shielding, and a protective outer jacket.

Product Overview

Professional Coaxial AV Connectivity

This high-quality coaxial cable is engineered for reliable audio and video signal transmission across various professional and home entertainment setups. Featuring a robust construction with a central copper conductor, dielectric insulation, and braided shielding, it minimizes signal interference for clear output. It is an ideal solution for connecting televisions, satellite receivers, and other essential AV equipment.

Technical Construction

Cable Components

- Central copper conductor
- Dielectric insulation
- Braided shielding
- Protective outer jacket

Signal Type

Audio • Video

Primary Applications

Television, Satellite Receivers, AV Equipment
