

# Coaxial Cable Connector Plug

This coaxial cable connector is designed for connecting cables to televisions and audio/video equipment. It is used for transmitting radio frequency signals.

## Product Overview

### Professional RF Connectivity

This high-quality coaxial cable connector is precision-engineered for reliable signal transmission in audio and video systems. Designed with a knurled metal exterior, it ensures an ergonomic grip for secure and effortless tightening. It serves as an essential component for connecting coaxial cables to televisions, VCRs, and various RF-sensitive equipment.

## Technical Specifications

### Compatible Equipment

- Televisions
- VCRs
- RF signal equipment

### Series Compatibility

TV Plugs • Jacks • Splitters • Matching Transformers

### Connector Gender

Male Plug

### Body Material

Metal, Knurled Texture
