

# Coaxial Cable F Compression Connector

F compression connectors terminate coaxial cables, providing a secure and reliable connection for transmitting radio frequency (RF) signals. They are compatible with RG6 and RG59 coaxial cables.

## Product Overview

### Professional F Compression Connectors

These F compression connectors are engineered to terminate coaxial cables, delivering a secure and reliable connection for radio frequency (RF) signal transmission. Designed for durability, the metal body provides robust shielding while the compression mechanism creates a tight seal against environmental ingress. This ensures optimal signal transfer with minimal insertion loss, making them an ideal choice for CATV, satellite, and broadband installations.

## Technical Specifications

Compatible Cable Types	RG6, RG59
Connector Type	F Compression Plug
Body Material	Metal

## Key Features

### Key Features

- Secure compression mechanism
- Environmental ingress protection
- High-quality signal integrity
- Minimal insertion loss
- Durable metal shielding

## Applications

### Common Applications

Cable Television (CATV) • Satellite Television • Broadband Internet
