

Coaxial Cable F-Connectors

F-connectors facilitate secure coaxial cable terminations. They ensure reliable audio and video signal transmission to devices like TVs, satellite receivers, and modems.

Overview

Professional Coaxial Connectivity

These F-type connectors are engineered for high-performance 75Ω cable systems, making them an ideal solution for CATV and broadcast television network infrastructures. Designed with both security and efficiency in mind, they offer reliable impedance matching and robust tamper protection. Their simple, streamlined structure ensures competitive pricing without compromising on connection integrity, making them a practical choice for professional installations.

Technical Specifications

Impedance	75 Ω
Installation Time	Less than 30 seconds
Primary Applications	CATV, Broadcast Television, Coaxial Cable Systems

Key Features

Performance Benefits

- Tamper protection performance
- Simple, cost-effective structure
- Quick and easy installation
- Visual inspection capability after connection
