

Coaxial Cable Splitter

This coaxial cable splitter is designed for splitting a single coaxial cable signal into two outputs. Each output has a 10dB tap loss and supports a frequency range of 5-1000MHz.

Product Overview

Professional Signal Distribution

This 2-way tap coaxial cable splitter is engineered for reliable signal distribution in audio-video applications. Constructed with a durable zinc alloy die-cast housing and nickel plating, it ensures long-term performance and robust protection. The unit features high-level electromagnetic shielding to maintain signal integrity across a 5-1000MHz frequency range.

Technical Specifications

Frequency Range

5 MHz

Min Frequency

1000 MHz

Max Frequency

Connector Type

75Ω-type

Thread Specification

3/8"-32UNEF

Tap Loss

10 dB

Electromagnetic Shielding

120 dB

Construction & Design

Installation Features

- Integrated ground hole
- Includes ground screw
- Fixed body mounting holes on both sides

Material & Finish

Zinc Alloy, Die-cast, Nickel Plated
