

Coaxial Cable with F-Connectors

Coaxial cable designed for the reliable transmission of audio and video signals. It features durable white insulation and gold-plated connectors for optimal signal transfer and corrosion resistance.

Overview

High-Performance AV Connectivity

This high-quality coaxial cable is engineered for reliable transmission of high-definition audio and video signals. Designed with durable white insulation and gold-plated connectors, it ensures optimal signal transfer while providing superior corrosion resistance. It is an ideal solution for seamlessly connecting televisions, satellite receivers, and a variety of other audiovisual equipment in professional or residential setups.

Technical Specifications

Connector Finish

Gold-plated

Connector Type

F-Connector

Insulation Color

White

Applications

Compatible Devices

- Televisions
- Satellite Receivers
- AV Equipment
