

Coaxial Cable with Male Connectors

High-quality coaxial cable for connecting TV aerials to televisions or set-top boxes. It features male connectors on both ends for easy connection and is designed for optimal signal transmission and minimal signal loss.

Product Overview

Professional Coaxial Connectivity

This high-quality coaxial cable is engineered for seamless transmission between TV aerials and televisions or set-top boxes. It features reliable male connectors on both ends, ensuring a secure fit and optimal signal integrity. Designed to handle both analog and digital signals, this durable cable minimizes signal loss for superior performance in professional setups.
