

Coaxial Cable with Right Angle Connector

Coaxial cables designed for connecting televisions to aerials or other RF signal sources. They feature durable blue insulation and are equipped with male connectors, with one straight and one right-angle connector.

Product Overview

Professional Coaxial Connectivity

This high-quality coaxial cable is engineered for seamless signal transmission in both analog and digital television environments. Featuring a unique combination of a standard straight connector and a right-angle connector, it provides exceptional flexibility for installations in tight spaces. The durable blue insulation ensures longevity and reliable performance for aerial and RF signal connections.

Technical Specifications

Design Features

- Durable blue insulation
- Secure signal transmission
- Space-saving right-angle design
- RF signal compatible

Connector Configuration

Male Straight, Male Right-Angle

Application

Compatibility

Analog TV • Digital TV • Aerial Systems
