

Coaxial Loudspeaker with Enhanced Clarity

This high-performance loudspeaker system features a coaxial design with a central tweeter and a robust woofer. The speaker is engineered for optimal sound dispersion and accurate audio reproduction across a wide frequency range.

Product Overview

Precision Audio Reproduction

This high-performance coaxial loudspeaker system is expertly engineered to deliver enhanced clarity and rich, deep bass response. By utilizing a central tweeter integrated within a robust woofer, it ensures accurate audio reproduction across a broad frequency range. The design features a rigid frame to minimize distortion and a durable cone material, making it a reliable solution for demanding audio applications.

Technical Specifications

Key Performance Metrics

100 W RMS
Power Handling

90 dB
Sensitivity

4 Ohms
Impedance

Frequency Response

50Hz - 20kHz

Construction

Build Benefits

- Enhanced sound dispersion
- Reduced audio distortion
- Long-lasting performance
- Deep bass optimization

Design Features

Coaxial Design, Rigid Frame, Central Tweeter, Durable Cone Material
