

Coaxial Video Cable

Coaxial cables used for video signal transmission. The cables have exposed conductors at the ends, revealing the inner core and shielding.

Product Overview

High-Performance Coaxial Video Transmission

This coaxial video cable is engineered for reliable signal transmission in professional video applications. Designed with durable shielding and high-quality core materials, it ensures minimal interference and signal degradation. Available in multiple jacket colors, it provides flexibility for organized cabling solutions in complex installation environments.

Technical Specifications

Available Jacket Colors

- Black
- Light Blue

Cable Construction

Inner Core • Shielded • Exposed Conductors

Cable Type

Coaxial

Primary Application

Video Signal Transmission, Broadcast Systems, Professional AV
